

CSE360- Computer Interfacing

Quiz 03; Spring'26

Set A

Name: _____ ID: _____ Section: _____

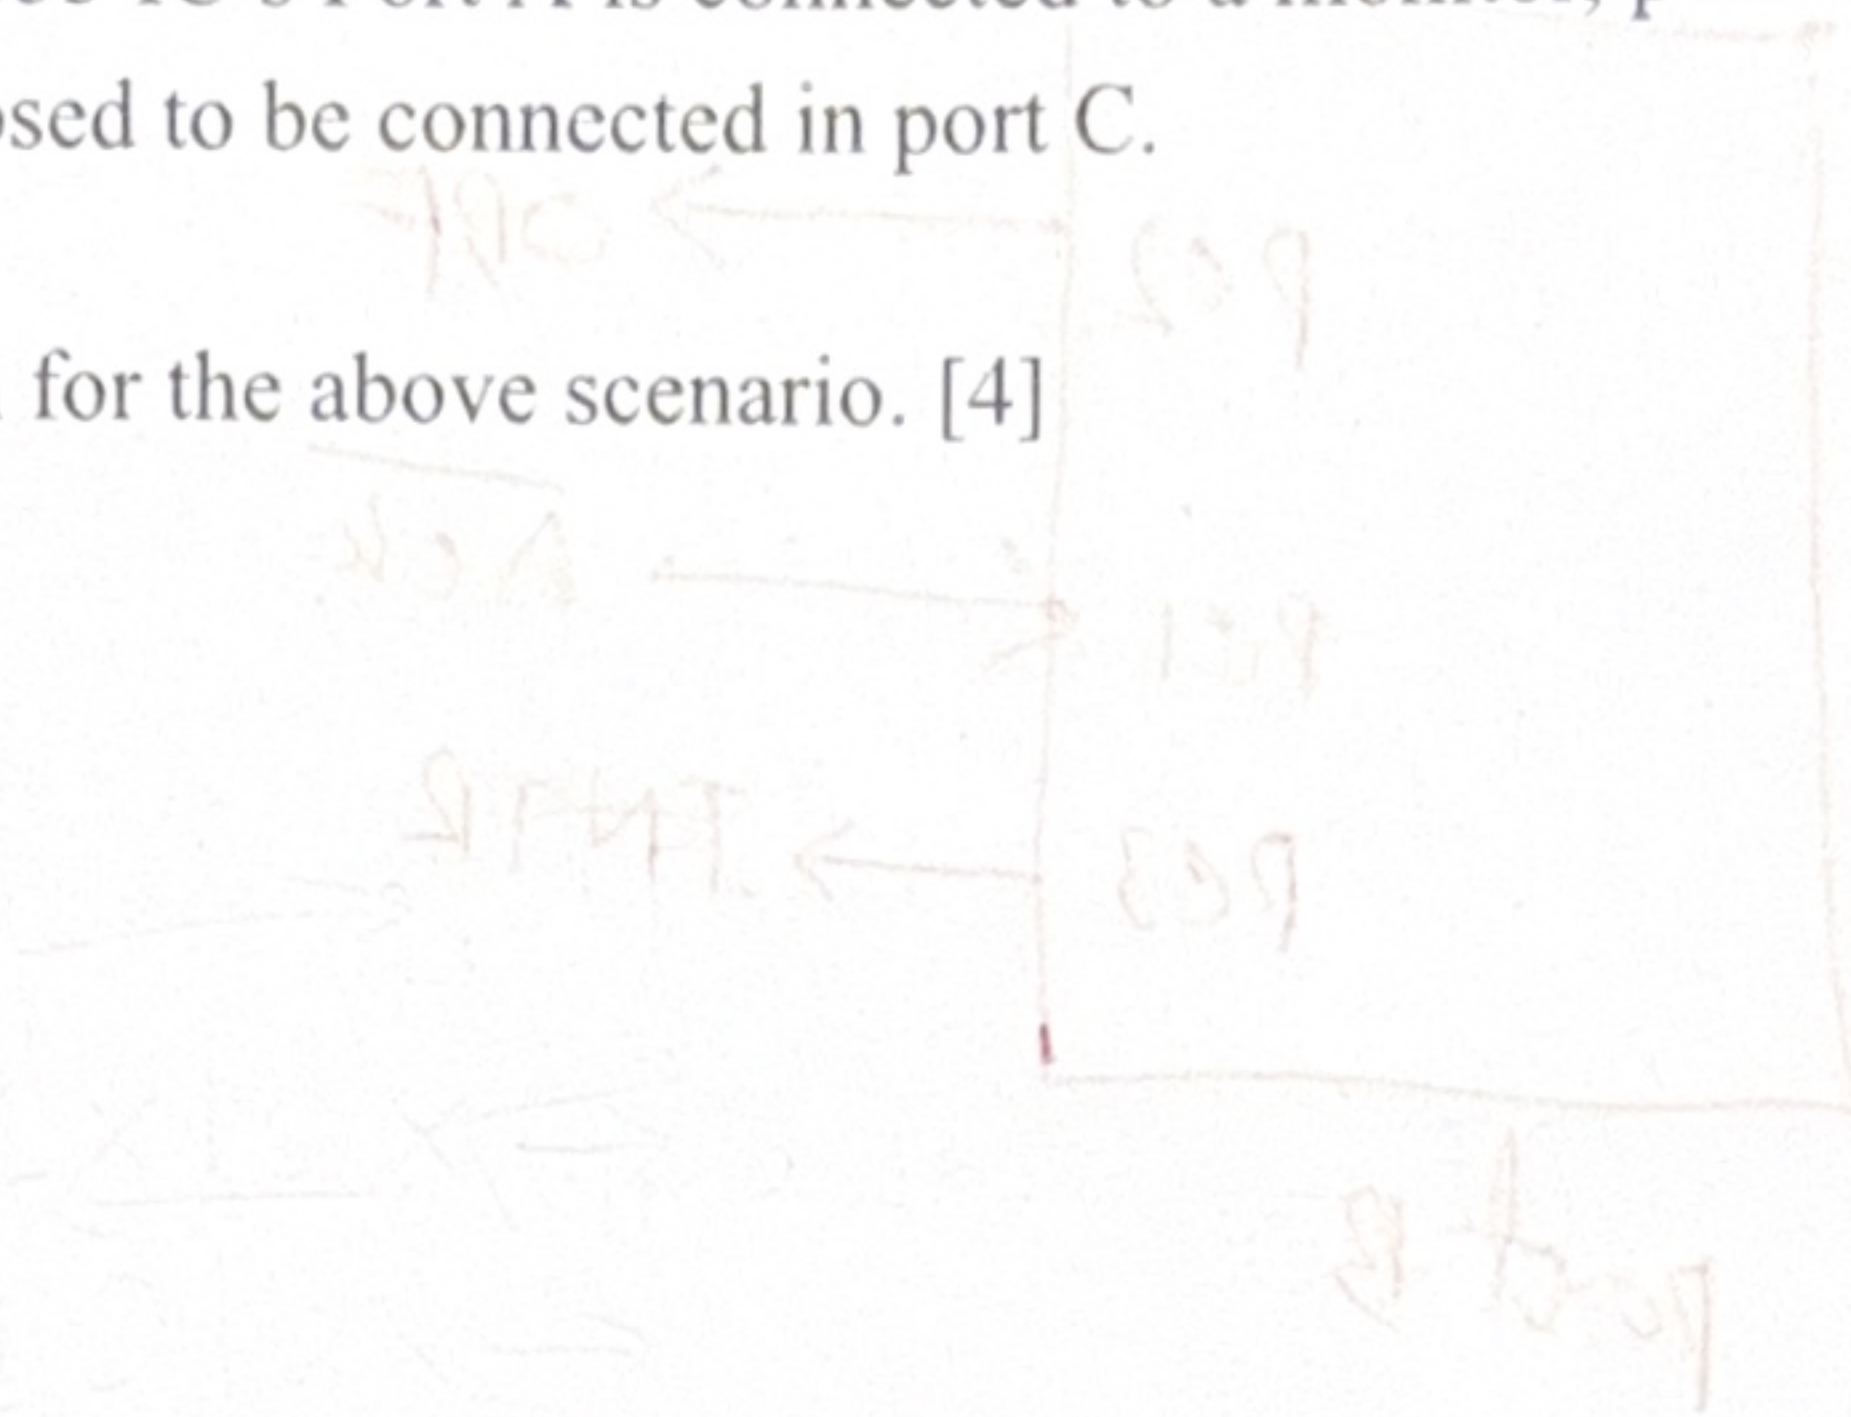

Marks: 15 points

Time: 20 minutes

Instructions: Answer all questions on the space provided below for each.

Question 1 (CO2 - 15 points): An 82C55 IC's Port A is connected to a monitor, port B is connected to a Keyboard and two switches are supposed to be connected in port C.

a. Draw the configuration diagram for the above scenario. [4]

b. Write down the control bits for the above scenario. [3]

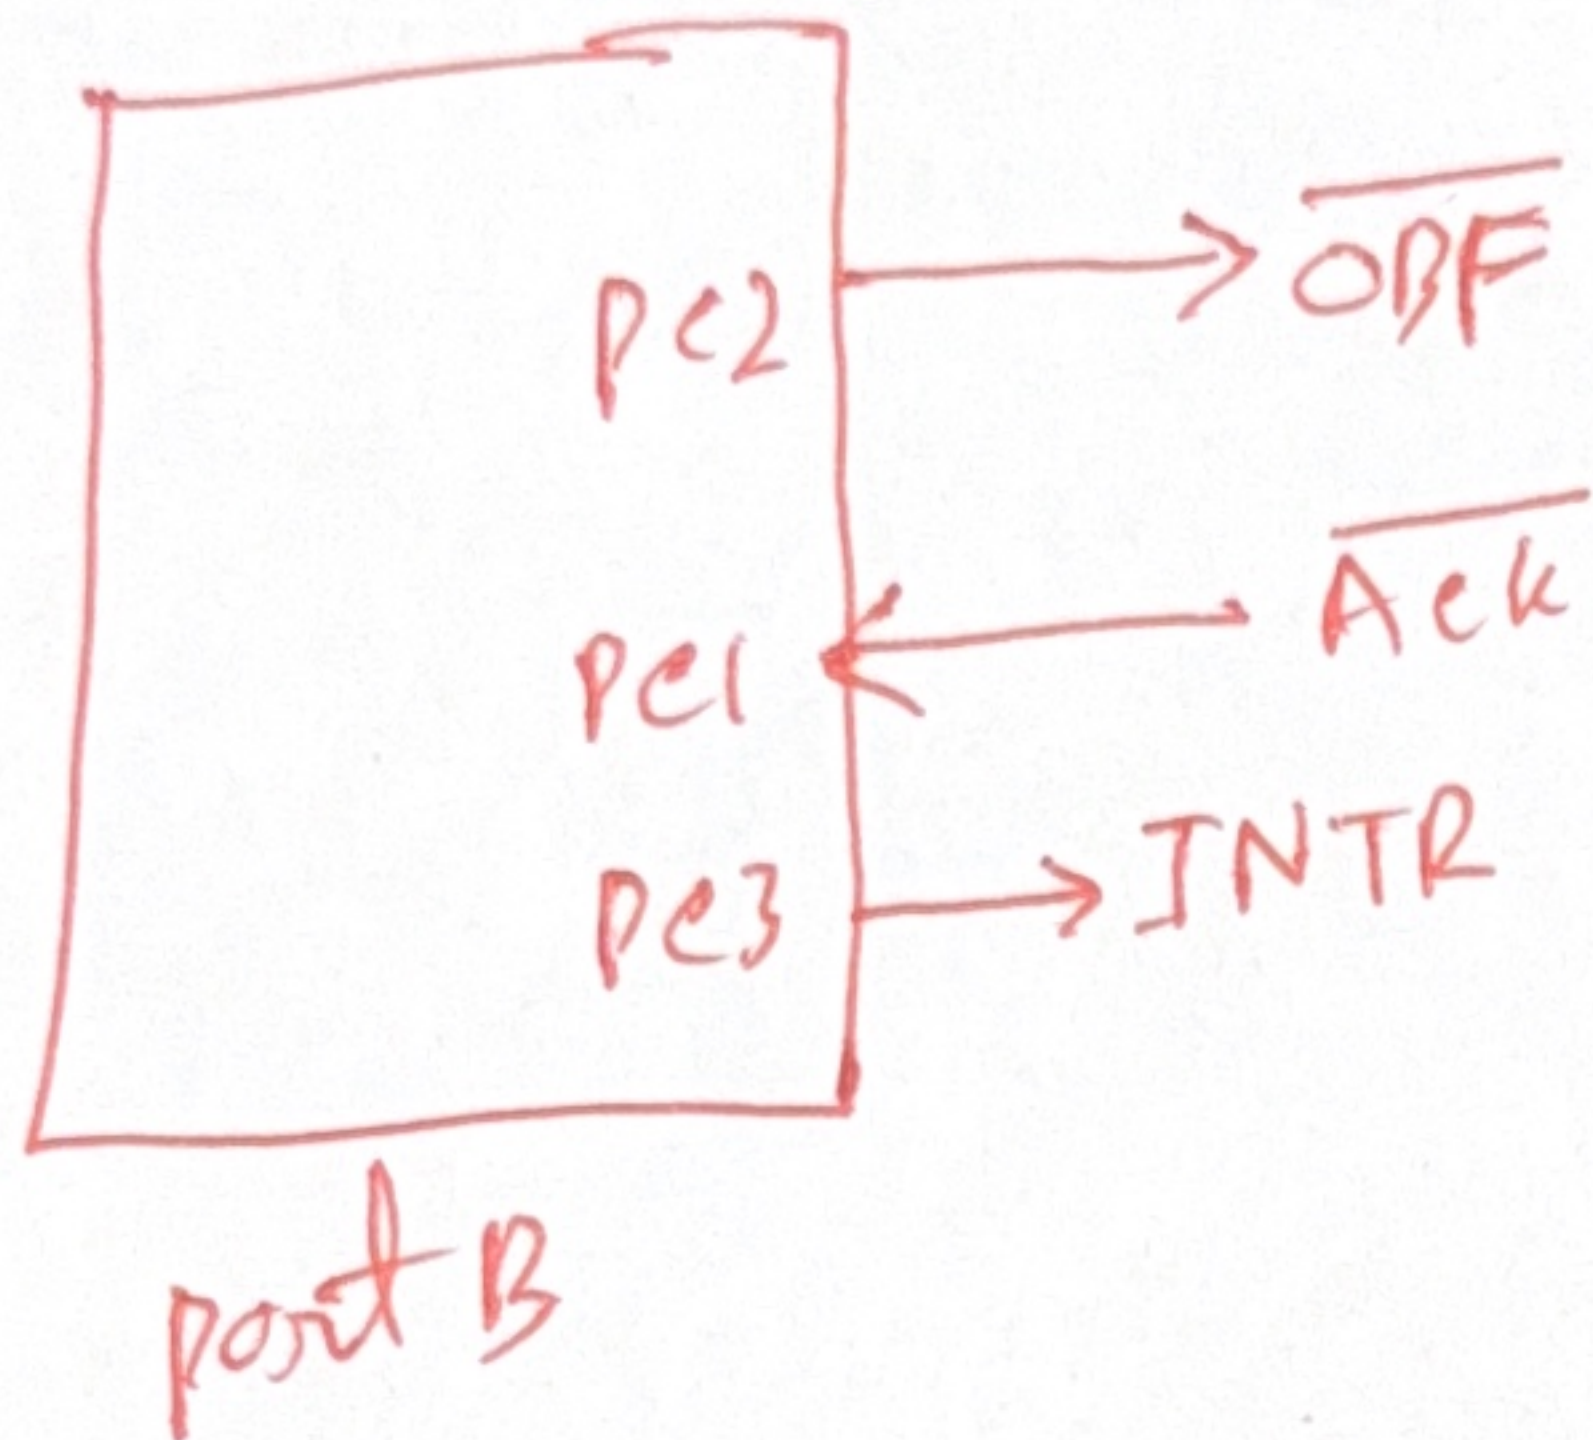

possible control
command
 $\left\{ \begin{array}{l} 1010X11X \rightarrow \text{two switches are still not connected} \\ 1010111X \rightarrow \text{" " are connected to } PC4, PC5 \\ 10101111 \rightarrow \text{" " " " to } PC0, PC4/PC5 \end{array} \right.$

c. Mention which pins of port C will be used to connect the switches in the system? [2]

PC0, PC4, PC5

- d. Draw the handshaking diagram of port B only for the given scenario with appropriate pin numbers and signal labeling and explain the handshaking process. [6]

input handshaking.

→ then study diagram.

between two data bus at 4 ← 1010101
register of address 1 ← 1010101
input 0.0 ← 1010101

Handwritten notes on the right margin, partially obscured and difficult to read.
